Professional Summary

- Senior Data Migration Engineer with strong experience in large-scale telecom BSS data migrations.
- Expert in designing scalable ETL pipelines using Python and PySpark, handling 100M+ records across Oracle, Cassandra, MongoDB, and MySQL.
- Proven experience in UK onsite delivery, multi-country projects, data quality validation, incremental processing, and performance optimization.

Experience

Tecnotree — Bengaluru, India

Senior Data Migration Engineer | October 1, 2024 – Present

- Leading large-scale telecom BSS data migration projects involving 100M+ records across Oracle, Cassandra, MongoDB, and MySQL systems.
- Architecting scalable ETL pipelines using Python and PySpark for high-volume batch and incremental processing.
- Delivering multi-country telecom migration projects (UK, Cameroon, Uganda, Bahrain) with 100% SLA adherence and strong data quality compliance.

Data Migration Engineer | October 1, 2023 – September 30, 2024

- Designed and implemented ETL pipelines for complex data migration across heterogeneous databases.
- Contributed to critical telecom transformation programs under strict delivery timelines.

Internship | February 2023 – September 30, 2023

- Supported telecom BSS data migration activities across multiple database platforms.
- Assisted in ETL development, testing, and reconciliation processes.
- Built strong foundations in large-scale data handling and migration workflows.

Key Projects

Lyca UK – Customer & Billing Data Migration (UK Onsite – 2 Months)

- Migrated 100M+ customer and billing records from Oracle to MongoDB and MySQL using scalable ETL pipelines.

- Built staging, validation, and rerun mechanisms to handle partial failures and ensure data consistency.
- Performed data cleansing, deduplication, financial reconciliation, and business rule validation.
- Converted relational data into JSON for MongoDB and structured tables for MySQL billing systems.
- Implemented incremental loads and optimized Spark joins and SQL queries for performance.
- Worked onsite in the UK for client coordination, data validation, and production go-live support.

MTN Cameroon & MTN Uganda – Customer & Billing Data Migration

- Migrated large-scale telecom data from Cassandra and Oracle to MongoDB and MySQL.
- Designed staging and validation layers for data cleansing, deduplication, and null handling.
- Implemented incremental loading, reconciliation checks, and rerun logic to ensure data accuracy.

Skills

Core Data Engineering: Python, PySpark, SQL, Linux Shell

Big Data & Processing: Apache Spark (PySpark), Batch & Incremental ETL

Cloud & Platforms: Azure Databricks, Azure Data Factory (ADF)

Databases: Oracle SQL, Cassandra, MongoDB, MySQL

Tools: Git, PyCharm, VS Code, DBeaver, Robo 3T, MobaXterm, WinSCP, Putty

Education

NIE Institute of Technology (NIE North), Mysuru

Bachelor of Engineering – Information Science and Engineering | 2019 – 2023

CGPA: 7.8

Certifications

- Data Analysis with Python – [Coursera](#)
- Python for Data Science, AI & Development – [Coursera](#)
- SQL Certification (Intermediate) – [HackerRank](#)
- Python Programming Certification – [HackerRank](#)

Honors & Awards

- Awarded internal Kudos for successful execution of high-volume telecom data migrations for MTN Cameroon and Lyca UK (UK Onsite) with 100% SLA compliance.
